(54) Title: A CASTOR

(57) Abstract: A castor for shopping and hospital trolleys which provides enhanced steering and manoeuvrability of the trolley, wherein a fork (13) of the castor is freely rotatable on a first bearing (15) with respect to a first member (16) connected to the fork (13), while the first member (16) is also freely rotatable on a second bearing (20) with respect to a second member (21) connected to the first member by a bolt (17). The second member may be connected to a frame or chassis (24) of a load bearing object such as a trolley.
